

Enrichment Class 2.5 Newsletter April

We explore the outdoors and garden! Our food exploration includes fruits and vegetables. During Circle Time, we begin the Great Seed Experiment. Our stories include The Carrot Seed, Growing a Garden and Gregory, the Terrible Eater. Gregory, The Terrible Eater will lead us into a new game called Big Mouth where we name the food and throw it into the very large head which is great for eye and hand coordination.

Art activities include a produce collage, painting a garden, and tearing and gluing tissue paper. The weather is getting warmer so we will begin playing with our gardening tools in the sandbox. **Remember to put sunscreen on your child before school.**

Prewriting projects include using a small paintbrush to control tracing on the lines and practicing small circle blueberries! Our cooperative game this month is Hi Ho Cherry –O. We will play Duck, Duck Goose and a fruits and vegetables game on the flannel board which will test our memory.

Our CATCH physical education program will get us outside throwing balls and catching them. We will go on a hike around the school to look for new birds' nests and new plants.

We have excellent fun planned for the month of April!

Mrs. Craft and Mrs. Craney
