

November Enrichment Class 3 &4 The Science of Baking!

November 4 We celebrate Science in the Kitchen

It is said that if cooking is an art then baking is a science. Anyone who has forgotten one TINY ingredient and had the whole batch flop can attest to this. We will experiment with common baking ingredients and why they do what they do. We look at Flour, Shortening, Leavening, Eggs, Sugar, and Salt.

November 11 The Gingerbread Man

A favorite tale retold. A Gingerbread Person Math Mat is perfect for a holiday game! Using a Gingerbread man as a non-standard unit of measurement we will guesstimate classroom width and length. Looking around we decide if classroom objects are bigger or smaller than a gingerbread man. We consider symmetry and the Gingerbread Man. And then we use probability to create our own Gingerbread Man.

November 18 Begin our backdrop for Nativity Play

We start designing the backdrops and settings for our upcoming Nativity Play. Our version of the sweetest story of all time comes to life with the Enrichment Class as actors, the story of baby Jesus. Mrs. Hieronimus comes to help us practice our lines and complete our art projects for display.

November 25 Rehearsal time to sing!

Our musical selections for the play include Silent Night with "candlelight", Away in a Manger, Mary Had a Baby with rhythm sticks, Hark the Herald Angels Sing and We Wish You A Merry Christmas! We will make our own instruments!

December 16 is our PM Enrichment Day Nativity Play

Love this time of the year, Mrs. Craft and Mrs. Dominy
